Campaign progress continues — How you can help!

by Rick Daluge, Campaign Chairman

I am pleased to report that just over $700,000 has been pledged for the Iota House Renovation Campaign for Excellence project. However, we still have a ways to go!

For those who have committed to a gift, thank you! For those who have been contacted by a member of the team, we hope you’re considering thoughtfully your gift to keep Iota the best fraternity on campus. For those of you who have not been contacted yet, never fear, you will have a chance to contribute, but the campaign committee is trying to make personal calls to as many brothers as possible before we send out a mass mail appeal.

In the mean time, think about what you might be able to pledge over a three-year time period. The average commitment from individual alumni so far is $6,215 with 113 alumni having pledged to date. If you made a gift and might be willing to assist in contacting members of your class, please let me know, as we can certainly use your help.

There are some other ways you can help. The Iota Educational Foundation and Corporation boards are seeking a loan to cover the costs of the project while campaign monies become available over the next five years. If you’re in the banking business, feel free to call Bill Hantke.

Secondly, if you’re in a business that could assist with any aspect of the construction project such as electrical, HVAC, or window replacement, please also contact Bill Hantke (608-442-7294) or Dave Uttech (262-894-8820) from Keller Construction (general contractor). We expect to finalize the sub contractors on the project by February 1, 2007.

Finally, the active chapter plans to leave the chapter house on the last weekend of April and move to the Short Course dorms for the last three weeks of school to allow an earlier start to the construction. Consequently, that weekend or during the following week, we’re in need of some men to move all of the house “stuff” to storage. Brothers Steve and Chris Nelson will be assisting us in this process through their moving company. Virtually everything in the house must be moved out such as composites, appliances, furniture, kitchen utensils, and so forth.

In conclusion, Iota is poised for the largest remodeling and renovation project ever undertaken. We are on track for that to take place this summer, but we need your financial support, your human resources, and your continued help in finding good young men to join and become part of the best fraternity on campus. We particularly hope that most alumni can make a partial payment on their pledge before August 2007 as that will allow us to have more funds available, and less will need to be financed. Thanks again for all your support so far, and please consider how you can be of help as we proceed with this major project.

New Noble Ruler elected in December

Brothers, my name is Matthew Repinski Brother “1441” and I am the new Noble Ruler for the Iota Chapter. I am currently a junior double majoring in dairy science and agronomy. This next year holds many exciting opportunities for our Chapter. Iota will once again strive to be one of the premier fraternities on the UW campus, as well as a stand-out on the national level.

In addition, through the dedication, commitment, and hard work from all the Iota men, the active chapter is extremely excited that progress for the renovation is picking up. We are currently working to get our spring semester calendar set and making plans for events like Competitive Edge, Founder’s Day, and our annual charity golf outing.

I am very excited to see a young officer team with a lot of energy coming from underclassman. I feel that we are headed into semester break with a lot of positive ideas which will allow us to come back in January fired-up and ready to tackle another action-packed spring semester. Many of the new officers are being very proactive to make sure we do not have a lag period during this time of transition.

— Matthew Repinski #1441
Brother Robert Bray passes away

ROBERT W. BRAY, #463, age 88, passed away peacefully surrounded by family on Sunday, Jan. 7, 2007. He was born and raised on a livestock farm in Dodgeville and received his primary education in Dodgeville. After receiving his B.S. at the UW, he received an M.S. degree from Kansas State University, and a Ph.D. from the University of Wisconsin. He married Gladys Kathryn Mader on July 2, 1943. He joined the faculty in the department of Meat and Animal Science at the UW in 1941, followed by a three-year stint with the Navy in World War II. He then returned to spend the rest of his career at the UW, retiring in 1984 as an Emeritus Professor.

He initiated the Meat Science teaching, research and extension programs at the UW. His initial research pertained specifically to the measurement of quantitative and qualitative factors important in the determination of carcass values which led to studies related to the biochemical and histological aspects of muscle and fatty tissues as associated with the preservation and palatability of meat. He served in the College of Agricultural and Life Sciences as associate dean and director of research for 17 years prior to his retirement. He served as chairman of the Reciprocal Meat Conference, the first formal organization of meat scientists and became the first president of the American Meat Science Association. During his career, he received the Distinguished Teaching Award from the American Society of Animal Science in 1962, the Distinguished Meat Science Research Award from the American Meat Science in 1969, was the first recipient of the R.C. Pollock Award from the National Livestock and Meat Board in 1977 for extraordinary and lasting contributions to the Livestock and Meat Industry and the Education Award from the National Association of Meat Purveyors in 1978. A notable contribution was his serving as superintendent of the Quality Meat Contest at the International Livestock Exposition in Chicago for 14 years and as a member of the Board of Directors of the Exposition from 1970 to 1976.

After retirement he edited "News and View," a newsletter for the WI Association of Meat Processors and continued a close relationship with its members during his entire life. The Wisconsin Meat Processors Association in 2004 renamed the trophy awarded to the exhibitor of the best product in its annual product show to the R. W. Bray Award of Excellence. While he was proud of his professional career and commitment to the UW, of utmost importance was his family and friends. He is survived by his wife of 63 years, Gladys Kathryn Bray.

In Memorium

January 2007
New officers introduce themselves

VNR of Recruitment — Elijah Rolli
Recruit is one of the four pillars of the Alpha Gamma Rho fraternity, and it is an essential component in maintaining this fraternity. One of my main goals for this coming year is to get more members involved in the recruiting process. I would also like to recruit 20 new members by the end of my term. Another goal of mine is to take our Becoming a Badger program on the road. What I mean by that is, in a high density area like the Milwaukee area, the Green Bay area, and the La Crosse area, an alumnus would host a dinner. We would invite prospective members and their parents to this dinner which would also be attended by a current member. Then we could tell them what Alpha Gamma Rho has to offer.

VNR of Membership Development — David Lammie
In the past few years, the focus of the Membership Development office has been solely on the education of new members. Granted this is an important process, but it should not distract us from keeping our older and out-of-house members involved. In the upcoming year I plan to further develop three parts of my office. The first part put a lot of thought into the Big Brother Program to ensure that the best possible pairings of brothers can be made. The second thing is to let brothers planning on living out of house know that it is encouraged to hold small events throughout the year that will give them the opportunity to interact with in-house brothers. The last and most important I wish to do is to start developing a Graduating Brother Education program of sorts. My goal for this is to ensure the seniors in-house stay involved because they are still expected to go through a few final steps before becoming an alumnus. This idea is a new one and won’t be put into effect right away, but is expected to do so in the near future.

VNR of Management and Operations — Evan Schnadt
Hi, my name is Evan Schnadt and I am the new VNR of Management and Operations. I am a Sophomore here at UW majoring in Dairy Science. This is my second year living in-house. I am from Sumner Iowa, which is three hours west of Madison in northeast Iowa. For my term as VNR-Management and Operations I would like to improve accountability in the house with certain issues related to M&O. I would like to improve and make a few modifications to weekly house cleanups and get members to complete them better. I want to be accessible to members and be prompt with any problems. Finally, I am looking forward to working with the newly renovated house and assisting in any way with the transition.

Message from the outgoing Noble Ruler

The semester is quickly winding down and with it my term as Noble Ruler. I cannot say in this limited space all that I have learned during the past year or how much this organization and the men in it have meant to me. AGR has been the best decision of my college career, and being an involved member has opened numerous doors and possibilities for my future. I would just like to take this opportunity to formally thank the numerous members and alumni who have made my tenure as NR enjoyable and successful and ask that you continue to stay involved in the future.

I would also like to take this chance to recognize the past year’s officer team. Brothers Evan Schnadt, David Lamme, Ryan Scannell, Ted Kaehler, Pat Ludwig, Scott Sternweis, Robert Weyker, Clayton Wohlk, Andrew Peterson, and Dan Kendall were instrumental to all of the progress and success garnered by the Chapter this year. Each officer brought a unique talent and perspective to the officer team. Together we formed a dynamic group that ushered in aggressive new policies and laid the groundwork for future officer teams to follow. I cannot thank them enough for their hard work and dedication over the last calendar year.

And don’t forget my challenge from before: I have challenged all of the past Noble Rulers to match or exceed my pledge of $2,500 to the AGR Campaign for Excellence. I hope that you all will continue to serve the fraternity and consider a gift to the future of the Chapter. Together we can truly build something special.

With that hard work and dedication displayed by the officer team, AGR was recently awarded the University Innovation Award. This award is given out once a year and recognizes student organizations that have implemented innovative ideas and programs to address current problems. The University recognized us for our work with the learning community program and the progress that has been made thus far. This prestigious award given at the University level represents the first award of its kind given to AGR. Next to this article you can see a picture of the outgoing officer team with the award.

So now I can look forward to “retirement” and actually having time to study! Once again, it has been a great honor serving in the capacity of Noble Ruler, and I am positive that the next Noble Ruler, Matt Repinski, will do a great job, as well. Please give Brother Repinski the same help, guidance, and support that you as alumni gave to me. And don’t forget my challenge from before: I have challenged all of the past Noble Rulers to match or exceed my pledge of $2,500 to the AGR Campaign for Excellence. I hope that you all will continue to serve the fraternity and consider a gift to the future of the Chapter. Together we can truly build something special. On Wisconsin!

— Tyler Wilkinson, Noble Ruler, #1440

Lost Alumni — Can you help us?
If anyone can give me an updated address for any of these Iota alumni, please contact Bill Hanke at (608) 442-7294 or e-mail behanke@att.net

Note: Information updated on December 24, 2006
Brother Ron Schuler retires from the University
by Gloria Hafemeister of the Wisconsin State Farmer

Brother Ron Schuler, #632, UW-Extension Biological Systems Engineering, is affectionately known as “The Big Shoe,” a name he picked up back in his college days at the University of Wisconsin-Madison. Schuler is retiring this January after a lifetime career of relaying the latest agricultural information to farmers.

When he was recognized by CALS Dean Rick Klemme for his years of work with UW-Extension, Klemme noted, “He also wears a lot of hats.” Klemme commended him for his years of juggling positions that involved relaying information about the latest research on farm machinery to farmers, coordinating and planning field demonstrations for Farm Technology Days, working with safety programs, developing 4-H literature, and starting and then heading up AgrAbility of Wisconsin. Schuler also works with the National AgrAbility project.

As for his work with AgrAbility, he says, “The thing that makes it gratifying is seeing the farmers on their farms continuing to do what they like to do. It’s what drives us all.”

Schuler is credited with starting AgrAbility of Wisconsin back in 1990 when he and Easter Seals Wisconsin applied for funding that started in 1991. At the national level he has been involved in the project since 2000.

Schuler grew up on a farm near Valders. That farm continued in the family and was operated by his brother, Merle, until last year when his brother passed away. The farm has now been sold.

Schuler relates that it was his brother who actually won the plowing contest that was the first Farm Progress Days in 1953. When Waupaca County hosted the show three years ago, the model toy tractor was like the one he used in the contest, and Merle Schuler signed the boxes of these collector units. He also located a plow and tractor like he used and was on hand at the show, as well.

Ron left the family farm to attend college at UW-Madison where he earned degrees in agriculture and mechanical engineering. After two years in the military he went to graduate school earning his masters and PhD. He did that work harvesting cherries in Door County.

He then served on the faculty at North Dakota State for six years and then spent five years teaching at the University of Minnesota. He spent three years at UW-Platteville where he also served as department chair.

Since 1984 he has been at the UW-Madison. He is only the second person to serve in that position. He took over for Orin Berge who also came from a farm at Valders.

A part of that job involved organizing the field demonstrations at Farm Progress Days, now Farm Technology Days. He also worked with agricultural machinery, conservation tillage, and conservation practices and went out to counties around the state to talk with farmers about these things.

Schuler has been responsible for conducting the state 4-H tractor driving contest that also includes the small engine project. He developed and took the photos for two national 4-H project guides for the small engine project.

He points to the AgrAbility program and “getting to know so many people” as the high points of his careers. He says there is also a lot of satisfaction in seeing a successful field demonstration at Farm Technology Days.

“I always say that’s my three days to be able to farm. I don’t actually drive the tractor but I do direct the operations.”

He also appreciates being recognized for his knowledge and the respect he gets from the farmers he talks with.

He’ll likely keep busy in his retirement. He plans to do some traveling, including visiting his son, daughter-in-law, and grandchild more often in Thailand. His son, Robert, is a lawyer in Bangkok (Thailand) where he is currently a partner in a law firm and plans to open his own office.

At age 66, Schuler says he could have retired sooner but he wanted to wait until his daughter, Sarah, completed her nursing degree at Madison. His wife, Barbara, is still working for the Wisconsin Technical College in the food curriculum area.

Schuler is active in the Kiwanis Club where he is currently second vice-president in charge of doing a weekly newsletter. Next year he moves up to first vice-president and will be in charge of arranging speakers. The following year he becomes president.

He said it is an interesting club and includes many retired Extension and agribusiness people. In fact, it was founded by the late Henry Ahlgren who was the first president of the club. Ahlgren also initiated the first Wisconsin Farm Progress Days, Inc. organization to continue what started as a National Plowing Contest in 1953. He was the director of UW-Extension Service and later Chancellor at Extension.

One of the fund raisers for the club involves going out to Epelgaard fruit and vegetable farm at Fitchburg. Members help manage the pickers during the pick-your-own season and cut up old fruit trees, bundle them, and sell firewood.

“We have a lot of ag-speakers at our meetings. We also host the all-city hockey banquet and music banquet and we help at football games,” he says.

“I also have plenty of work to catch up on at home,” he adds.

Funding has been approved for his successor, although he said the 4-H part of the job may be separated into another position.
Iota needs alumni to serve as mentors

IT WAS confirmed at the AGR National Convention that the chapters with the most alumni involvement seem to win most of the awards and are the strongest and the most active chapters. AGR chapters at Illinois, Purdue, Iowa State, and so forth have had mentoring programs for several years and have found them very worthwhile and rewarding for the alumni. Iota alumni need to become more involved in the activities of the Iota Chapter by serving as mentors to our younger brothers in order to make our fraternity even stronger.

During the National AGR convention we attended an alumni involvement seminar that sparked some ideas that Iota needs to pursue if we are to become a stronger AGR chapter. We have formed a preliminary list of mentoring opportunities for our alumni. With your assistance we can become the premier AGR chapter.

Here is a list of current officer positions and alumni needed to serve as mentors and to assist current officers in their duties. This list is not complete so if you have any other ideas of how you can assist the chapter that is not listed, please let me know.

• Noble Ruler – 1 alumnus
  ✓ Assist with leadership of the chapter on a group and individual basis
• Vice Noble Ruler – Recruitment – 20 alumni
  ✓ Assist with the recruiting of incoming freshmen and transfer students
• Vice Noble Ruler – Finance – 1 alumnus
  ✓ Assist with the accounting procedures and investment principles
• Vice Noble Ruler – Scholarship – 1 alumnus
  ✓ Assist with motivating brothers for academic excellence
• Vice Noble Ruler – Planning – 3 alumni
  ✓ Chapter History – assist updating our history as we approach our 100-year anniversary
  ✓ Philanthropy – assist the chapter in setting up and maintaining year to year activities
  ✓ Public Relations – assist the chapter in press releases to hometown newspapers, and so forth
• Vice Noble Ruler Management and Operations – 1 alumnus
  ✓ Assist with general maintenance and house improvements of the chapter house
• Vice Noble Ruler Membership Development – 1 alumnus
  ✓ Assist with continuing personal development for members
• Vice Noble Ruler Alumni Relations – 1 alumnus
  ✓ Assist with the planning of active/alumni activities throughout the state
• Vice Noble Ruler Activities – 1 alumnus
  ✓ Assist with planning of active chapter formals and other social events

We are seeking the help of about 30 dedicated Iota alumni to assist with the mentoring of chapter officers and some assistance with our high school recruiting effort. We would like a two-year time commitment from you, after which another Iota alumnus will take your place. If you are interested in assisting with this project, please contact us:

Karl Drye #692, 915-459-8518, e-mail karldrye@comcast.net
Tim Pierce #1433, 608-237-7068, e-mail tpierce@uwalumni.com
Fraternally,
Alumni Mentoring Program

New officers introduce themselves

VNR of Scholarship — Clayton Wohlk

Being elected to the VNR of Scholarship is an important step to gain more leadership experience and to become more involved in the chapter. The officers who have come before me have done a great job running the office, and I can only foresee a few changes that I would like to see take place. One change that I would like to make is putting the exams and quizzes from previous years on the AGR website to make them more accessible to everyone. The other change that I would like to make is by giving people a little more incentive to win the Scholar of the Week Award by offering a bigger reward rather than just the certificate. I hope I can implement these changes affectively and that they will complement the existing program that is in place.

VNR of Alumni Relations — Alex Newman

I come from Menomonee Falls, Wis. — a village outside of Milwaukee. As the new VNR of Alumni Relations, I want to make sure that we don’t lose contact with any of our alumni while we get caught up in these changes. Without the generous help the alumni, the renovations would not be possible, and I also hope to get the alumni involved with the learning community. I am a very social person, so feel free to give me an email (anewman2@wisc.edu) anytime and for whatever reason. Above all, I want to make sure that the alumni realize that as we move away from the more traditional AGR member – with majors like Dairy Science, Animal Science, and Agronomy into other majors like Biological Systems Engineering, Biology, and Genetics – we will still work to keep our traditional values of brotherhood, commitment, and making better men. I cannot wait to get into contact with many of you this year.

VNR of Activities — Kellen Sturz

We look forward to many fun and exciting things this coming year at AGR-Iota, one of which is getting more involved on the Greek campus here in Madison. The main way we will be accomplishing this is by inviting other fraternities and sororities over to the house for dinners and movie nights. It is something that we feel very strongly about as our name on campus is not as well-known as we know it should be. Also, we want to get our name out into the community at large by participating in more philanthropy events and community service projects. As it is now we are starting to move in this direction with our involvement in Project GIVE and Salvation Army Bell Ringing, both of which had great chapter turnout and helped greatly to get our name into our community. We hope to make community service a more prevalent role in the chapter schedule of events and to get our members out to help make our community a better place to live.

VNR of Planning — Justin Banach

I am honored that my fellow Brothers elected me to be VNR-Planning for the next year. While holding this position, I hope to complete all of the tasks that are required and to assist other members of the officer team with their duties. As VNR-Planning my main responsibilities are to take notes at our meetings, plan a few various events, and keep nationals informed of any major happenings here at Alpha Gamma Rho-Iota. I am not going to make any sweeping changes as VNR-Planning, but I hope to accomplish my required tasks in an efficient manner.
The active chapter hopes everyone had a great holiday season!
